SHIVALI V

LinkedIn: https://www.linkedin.com/in/shivali-v-377977298/ Email:shivali.vannarath@gmail.com
GitHub: https://github.com/Shivali-10 Mobile: 7907462310

Skills

- **Programming Languages**: Java, Python
- **Web Development**: HTML, CSS, JavaScript, Java Swing, AWT
- **Frameworks & Libraries**: Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow, NLTK
- **Domain Knowledge**: Data Structures and Algorithms, OOPs, Networking, Operating Systems
- **Soft Skills**: Adaptability, Problem Solving, Communication, Teamwork

Projects

Model Monitoring and Drift Simulation | GitHub March 2026

- Built an end-to-end ML monitoring platform on 284,807 credit card transactions to detect data drift and automate model retraining
- Detected data drift using KS Test, PSI and KL Divergence, identifying 13.2% recall degradation across 4 weekly time windows.
- Designed automatic retraining pipeline that restored AUC-ROC from 0.9255 to 1.0000 upon drift threshold breach
- Deployed interactive Streamlit dashboard with live Supabase PostgreSQL integration real-time model performance monitoring

Enterprise NLP Financial RAG project| GitHub January 2026

- Developed a Retrieval-Augmented Generation (RAG) based NLP system for financial document analysis, enabling accurate question answering from large unstructured datasets.
- Implemented semantic search using embeddings and vector databases, improving the accuracy and relevance of retrieved information.
- Developed an end-to-end pipeline integrating data preprocessing, retrieval, and LLM-based response generation for extracting meaningful insights from unstructured financial data.

Diabetes Prediction Using Machine Learning| GitHub July 2025

- Developed a binary classification model to predict diabetes using demographic and biometric health indicators.
- Performed data preprocessing including missing value imputation, outlier handling, feature encoding, and normalization.
- Performed EDA to analyze correlations between health indicators and diabetic status.
- Trained and evaluated Logistic Regression and Decision Tree models using multiple performance metrics.

Training

CipherSchools | Certificate June 2025 – July 2025

- Machine Learning with Data Science Intern
- Completed a 6-week intensive internship focused on the end-to-end machine learning lifecycle, including data preprocessing, exploratory data analysis (EDA), feature engineering, model development, and evaluation.
- Applied Python libraries such as Pandas, NumPy, Scikit-learn, Matplotlib, and Seaborn.
- Developed and evaluated classification models (Logistic Regression and Decision Tree) using performance metrics including Accuracy, Precision, Recall, F1-score, and ROC-AUC.
- Implemented structured validation strategies and preprocessing techniques to improve model reliability and generalization.

Certification/Certificates

- Cloud Computing | NPTEL October 2025
- Data visualization: Empowering Business with Effective Insights | Forage April 2025
- Machine Learning with Data Science | CipherSchools March 2024
- Data Modeling with Power BI: Advanced DAX Calculation| Coursera December 2024
- Responsive web design | freeCodeCamp November 2023

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; CGPA: 6.99 Since August 2023
- **Durga Higher Secondary School** Kanhangad,Kerala
  Intermediate; Percentage: 92 April 2021 - March 2023
- **Sadguru Public School** Kanhangad, Kerala
  Matriculation; Percentage: 90 April 2020 - March 2021
